Changelog V3

- **Total supply lowered to 3,888**
- **V2 foreword removed**
- **Drop structure updated**
- **Monki Swap introduced**
- **Partnership allocations updated**
- **Milestones updated**
- **Team members updated**
- **Project teaser page updated**

Mission Plan

Lil Monki is the first family of **Lil Creatures** to populate the **Lil Universe**. There will be a total of **3,888** provably unique **Lil Monkis**, each with their own charm waiting to be adopted. With **Lil Monki** and the **Lil Universe**, we aim to foster a **wholesome community** and **do good** whilst promoting **NFTs** residing on **Hedera Hashgraph**.

For all **Lil Creatures** we will implement utility once the required functions are available and tested. Our utility will consist of **staking, discounts, airdrops, giveaways and more** for holders of 'Lil' NFTs. In addition, we will introduce and maintain our own token, **\$LIL**, which will be supported by a percentage of income from all NFTs in the **Lil Universe**.

We do not want to sell **\$LIL**. Instead, we plan to airdrop these tokens and let them find their place and value in the market organically. Amongst other perks, **\$LIL** will allow people to earn passive income and purchase exclusive drops.

In addition to the partnerships and collaborative drops released, we are also in talks with more amazing projects to continue our collaboration streak. We choose to build on Hedera because of its unique, unmatched advantages, such as speed, low and predictable fees, decentralization and environmentally-friendly qualities. In addition, the community is pretty **awesome**, too.

Lil Monki

Lil Monkis are a family of 3,888 unique personable Lil Creatures that will populate the Lil Universe. Their otherworldly genetics allow each Monki to inherit from a pool of 378 attributes. In total, there are over 2 billion possible unique Lil Monkis. Not only did they bring themselves from their home planet, but also their valuable collectibles. Furthermore, through mastering some ancient magic voodoo, these Lil Monkis and their collectibles will gradually be able to provide value-creating utility.

Benefits & Utility

Tier 0 (Cosmo Monki VIP):

- Maximum benefits when also holding any Lil Monki
- Highest % discount on select Lil Universe NFTs
- Most likely to receive airdrops
- Giveaways and airdrops of highest rarity NFTs
- Highest allocation of airdropped \$LIL
- Access to Monki Farms

Tier 1 (All Lil Monkis + Select Few):

- High % discount on select Lil Universe NFTs
- Likely to receive airdrops
- Giveaways and airdrops of high rarity NFTs
- High allocation of airdropped \$LIL
- Access to Monki Farms
- Includes 1/1 Monkis that aren't Buckets (Lil Angel & Lil Devil)

Tier 2 (Seasonal Specials + Some Collabs):

- Average allocation of airdropped \$LIL
- Access to Monki Farms

Bucket Tier (1/1 Bucket Hat Monkis):

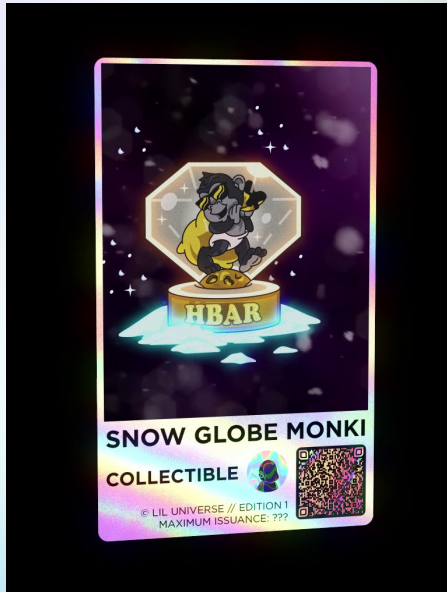

- Same benefits as Tier 1 (See above)
- Access to private Discord channel
- Access to some presales

Monki Swap

Recently, we have noticed a lack of liquidity in the HBAR space.

To accommodate this, we have decided to lower the Lil Monki supply and introduce the Monki Swap in order to benefit our early supporters.

Many of you purchased our Tier 2 Monkis in the form of collaboration or holiday pieces and aren't able to utilize them as much as you'd like.

We think the following changes will open up great choices for you.

For the Lil Universe team, our NFT journey has been a continuous learning curve and we're learning new things every single day.

We consistently listen, learn and improve and hope to benefit our fans as much as possible.

The 'Monki Swap' Program

- Tier 2 Monkis were intended to be used in farms for unique NFTs, hence we assumed having a higher supply would make sense. However, some time is required and we are aware people would not want to hold NFTs that aren't unique, aren't too liquid and can't be utilized yet.
- Of course we will still honor being able to farm NFTs unique to just the Tier 2 Monkis, however we would like to open up an option to people who would prefer having unique NFTs (Tier 1 Lil Monkis from main collection) sooner.
- Holders will be able to trade in 2 of their Tier 2 Monkis for a Tier 1 Monki. As a result of our Monki Swap we will reduce the circulating supply of Tier 2 Monkis by vaulting what we receive as trade-ins and burning them when it is possible to do so.
- Furthermore this will also make NFTs farmed with Tier 2 Monkis rarer. We consider this a win-win, those that enjoy the NFTs and hold longer till the farms and those that would prefer a main collection Monki will benefit.
- Monki Swap is likely to be available after Drop 2.

Conditions for Monki Swap:

- 2x Tier 2 Monkis to 1x Tier 1 Monki
- Maximum: 3 swaps per person.
- Total: 800 Tier 1 Monkis allocated to this program.
- First come first serve when Monki Swap opens.

The following Monki collab/holiday editions are qualified for the swap:

2 to 1 Swap

- Spooki Monki
- Lil Christmas Collection
- Chinese New Year Monkis
- Lil Fugitives
- LSH x Lil Monki
- Lil Teddybars

1 to 1 Swap

- Ordinary guy x Lil Monki

Note: Other Monki NFTs may be added to the swap in the future.

Staking & Farming

Powered by:

Lazy Superheroes will allow the Lil Monkis to use their NFT farming technology. Lil Monki holders will be able to stake their NFTs for a specified period of time to earn exclusive rewards, such as special edition NFTs.

The goal is to also let all collaboration and special event pieces be farmable. For example, users may be able to stake 1 Lil Monki + 1 Lil Fugitive to earn a rare unique Lil Fugitive. Rewards for each staking combination will be limited to a certain amount stated within the farm.

Some legendary rewards may require more NFTs to be staked, for example, 1 Cosmo Monki + 1 Bucket Hat Monki. There will be different tiers of Monki Juice. Each tier will lessen the duration by a certain amount of time. Examples are shown in the table below.

Reward	Conditions	Duration	Duration with Monki Juice	Stock
Rare LSH Monki (only available via farm)	Lock Any Three Lil Super-Monkis	30 days	Uncommon Monki Juice = 25 days	30
Rare Lil TeddyBar (only available via farm)	Lock Lil TeddyBar + Two Lil Monkis	30 days	Rare Monki Juice = 20 days	30
Rare Lil Fugitive (only available via farm)	Lock Any Lil Fugitive + One Lil Monki	50 days	Legendary Monki Juice = 25 days	15
Special 1/1 Holiday Monki (only available via farm)	Lock Complete Christmas Collection	7 days	N/A	10
Rare Monki Juice	Lock Five Tier 2 Monkis OR Two Tier 1 Monkis	45 days	N/A	50
Legendary Monki Juice	Lock Five Tier 1 Monkis + Cosmo Monki	70 days	N/A	10
Snow Globe Monki	Lock Cosmo Monki + Lil Monki OR Bucket Hat Monki	30 days	Legendary Monki Juice = 15 days	50
Papa Monki	Lock Two Cosmo Monkis + Two Lil Monkis OR One Cosmo Monki + Bucket Hat Monki	60 days	Legendary Monki Juice = 30 days	25

* Note these are just examples to explain how the farm would work. Nothing is finalized and everything you see here might change to be more in line with rarities and supply when farms are closer. We will also have more options than shown here.

The Lil Universe

Lil Creatures

The Lil Universe is where all things 'Lil' end up. Don't ask us how. Maybe Lil Creatures live in a simulation, controlled by three puppet masters. Maybe. Lil Monkis will be the first to populate this ecosystem. They are scheduled to be joined by other Lil Creatures in due time, to be voted on by the alleged puppet masters and their community. Each Lil Creature will arrive with their own unique collectibles. Who knows how many they will secretly reveal.

\$LIL (Lil Universe Token) + Private Shops

\$LIL will be the token Lil Creatures transact with. \$LIL is supported by a percentage of \$HBAR income from the entire Lil Universe. The Lil Creatures would like to wait for a Hedera DeFi (Decentralized Finance) solution before launching \$LIL. The plan is to have a \$LIL/\$HBAR liquidity pool in an Automated Market Maker platform.

\$LIL will be used for exclusive drops or special partner drops, to name a few. Each Lil Creature has the magical ability to earn \$LIL out of thin air. Some earn more than others. These could be used to buy NFTs, sold for \$HBAR or locked up and staked. The \$LIL airdrop characteristics will be similar to the FTSO (Flare Time Series Oracle) delegation rewards of the Flare Network.

In essence, there will be a set amount of \$LIL available to claim every day. This amount will be split between all participating NFTs. Therefore, the more NFTs claim \$LIL, the less each one gets. The less the participants, the more each gets. NFTs will be tiered and therefore receive varying allocations of the total pool. Specific tokenomics will be revealed in due time.

Additionally, Lil Monki holders will have access to the private shop and be able to spend \$LIL and purchase special collections not sold anywhere else.

Charities

A motto we live by is to "do good." We will seek reputable charities that spend our donations properly. We will have intensive community participation via suggestions and votes. **We will make a difference.** We could help clean our oceans or animals in need. We could even adopt them as a community - which we already did!

Auctions

Inherently special items from our original mints - like #0000 NFTs or custom 1/1 editions - may be put up for auction instead of a direct listing. A portion or all of the proceeds could be put towards benefiting the Lil Universe community if we choose to add proceeds to a \$LIL liquidity pool. External communities could also be supported if we choose to allocate the proceeds to charities or institutions that help people in need.

Community Events

Participate and win! Maybe you win a scavenger hunt and get extra giveaway entries or special NFTs. Same goes for meme contests, fan art contests, Monkis Got Talent (okay, maybe not this... unless?). We may even have NFTs paying royalties to the community. The possibilities are endless.

Clothing & Merchandise

Fun, stylish and high quality merchandise designs are on the table. No specifics as of now, but we will only market merchandise and collaborative pieces people actually want.

Partnerships & Collaboration

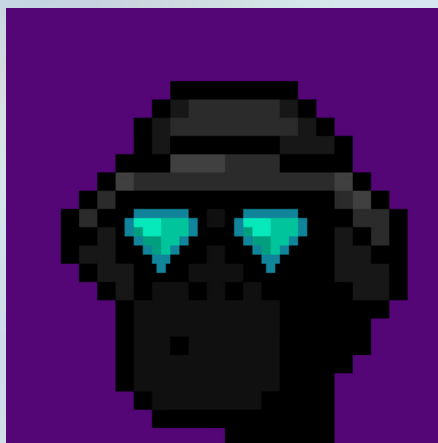

The Lil Universe is a place of inclusivity, discovery and just cool stuff in general. We love to collaborate to create unique hybrid NFTs. In addition, we want to promote Hedera to other creators, aiming to help them mint on our favorite DLT (Distributed Ledger Technology). We are always in talks with teams and artists with the goal of creating hybrid pieces or helping them launch on Hedera.

Select Lil Universe NFT holders will receive benefits, such as discounts, airdrops or early access. We have already created plenty of amazing collaborative pieces with friends as mentioned in our foreword. Further projects in talks are:

- Speechless, didn't expect to make the white paper. These Lil Monki guys are really nice. They did not write this for me.

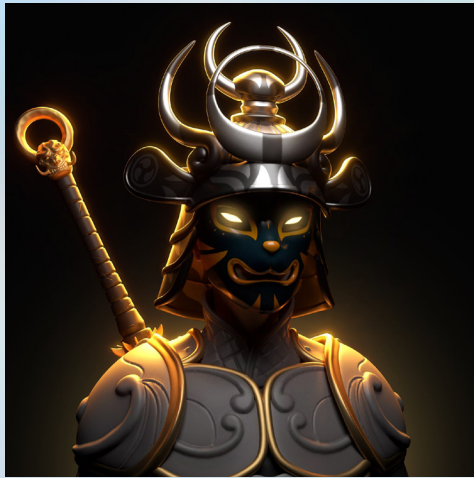

Welcome to our Lil Universe.

And wait. It's expanding.
